EXPERIENCE

Mattel, Inc

Associate Software Engineer, Discovery Tech Lead

El Segundo, CA
July 2024 - Present

- Rapidly building web-based, mobile, and physical prototypes across agentic workflows, connected products, and API integrations as part of Mattel's R&D team utilizing Agile/SCRUM methodologies
- Leading technical architecture for an AI-personalized consumer product (unannounced) targeting 100,000+ year-one users, spanning LLM integration, guardrails, cloud computing, and human author/illustrator collaboration
- Collaborating alongside a team of 10+ designers and product developers, requiring consistent cross-functional team communication via design flowcharts and thorough documentation
- Created an internal search optimization tool parsing 100+ documents to aid Mattel designers and executives

Software Engineering Intern

June 2023 - July 2024

- Developed an interactive Mattel virtual character platform supporting 50+ internal users using Unity and Azure

Pomona College Computer Science Department

Teaching Assistant

Claremont, CA
August 2023 - May 2024

- Co-taught 2 sections of Languages & Computation Theory to 40+ students, holding 3+ hours of weekly instruction

Keck Graduate Institute

Machine Learning Research Assistant

Claremont, CA
January 2023 - May 2023

- Collected and visualized NLP data with a team of 3 graduate professors using Python, Gensim and Matplotlib
- Applied topic modeling and other unsupervised machine learning techniques to group 9 million+ tweets by topic

PROJECTS

AfricActive Volunteering Organization Website

January 2026 - Present

- Revamping site for africActive (local food distribution nonprofit org) with sleek design and updated assets
- Modernizing dashboards and UI to drive crucial donations from 1,000+ supporters

Book Club Website

February 2026

- Built and deployed full-stack book club platform for 8+ members using React, Vite, and Supabase, featuring passcode-protected ratings, image hosting, and a database architecture supporting a full year of selections

Regular Show Quote of the Day Website

September 2025 - November 2025

- Constructed an original corpus of 25,000+ lines of script dialogue and visualized using Matplotlib to extract key statistics about character representation
- Created public-facing site featuring character assets, a timer, and other front-end features using Javascript

Photo-Sharing Website Reliability Maintenance

January 2024 - April 2024

- Utilized AWS EC2, Tomcat, PostgreSQL, and Tmux to deploy a functional photo-sharing website
- Monitored the site on-call using New Relic and alerted 3 team members of errors using PagerDuty
- Scaled site infrastructure using load balancing to process requests for over 10,000 users

EDUCATION

Pomona College

BA, Computer Science & Minor in Cognitive Science

Claremont, CA
May 2024

GPA: 3.94 **Honors:** Pomona College Scholar Award

Relevant Coursework: Computer Systems, Managing Complex Systems, Algorithms, Data Structures, Linear Algebra, Game Engine Programming, Computational Media, Languages & Theory of Computation

Danish Institute for Study Abroad

GPA: 3.93 **Relevant Coursework:** Computer Graphics & 3D Programming, Game Development *Fall 2022*

SKILLS

Programming Languages: C#, Python, Javascript, TypeScript

Full-Stack Development: React, Vite, REST APIs, LangGraph, agents, Supabase, AWS, GCP
